PERSONAL PROJECTS

Lem-in [C] (06/2019 - 07/2019)

- Algorithmic project on graph theory. The main goal was to find all ways from start to finish and choose the most efficient for different examples.
- It this project I understood how graph theory works, what is BFS algorithm and how to implement it.
- Github link: <https://github.com/past77/Lem-in>

Avaj-Launcher [Java] (07/2019 - 08/2019)

- Simple aircraft logistics simulation program.
- I worked with Java Core, Design Patterns, UML class diagram, read from and write in files, create own exceptions.
- Github link : <https://github.com/past77/Avaj-Launcher>

HTMLParser (08/2019 - 09/2020)

- Parse HTML page and stored data in JSON file
- Worked with Java Core, Java Collections API, JSoup, HTML, Selenium, Jackson, JSON.
- Github link: <https://github.com/past77/JsoupParser>
